phone: +1 857 285 8498

Tools.

Concept + Visual

Creative Direction, Concept Development, Visual Storytelling, Figma, Adobe Creative Suite (Ps, Ai, Id, Ae, Pr, XD).

3D + Environments

Rhino3D, SolidWorks, Revit, Grasshopper, Maya, 3Ds Max, SketchUp

Visualization + Experience: V-Ray, Corona, Unity3D, Unreal Engine, AR/VR/MR, TouchDesigner.

Making + Prototyping

CNC, 3D Printing, Laser Cutting, Casting.

Creative Technology

Java, C++, C#, Python, GLSL, CSS, JavaScript, HTML, Tableau.

Creative Practice + Interests

Nail Art, Ceramics, Embroidery, Urban Sketching, Ballroom Dancing.

Select Achievements.

Samsung x Media Lab Project the Future Hackathon, 1st Place, WJM Design Award (\$3000 equivalent)
Designed an interactive product for kids using projections to tell stories.

Harold Horowitz Research Fund
to develop an exhibition (\$1000) about the future evolution of the human body.

ACSA/AISC Steel Design Competition, 1st Place, Category II: Open (\$2000) selected in international student competition amongst 900 entrants.

Select Publications.

Routledge: "Videogames and Architecture: Intersecting Worlds"
Co-edited with V. Hui, R. Scavnicky

Infonomics Society: "Extended Realities to Extending Realities in Architectural Pedagogy" Chapter in Learning and Teaching Methodologies Co-Authored with V. Hui, A. Huang, G. Zhou

Multidisciplinary concept designer working across products, environments, emerging technology, and visual storytelling. Trained in architecture and computation at MIT, with experience translating future-facing ideas into compelling physical and digital experiences at Amazon Robotics, Tesla, and design practices.

Work Experience.

Industrial Designer at Amazon Robotics in North Reading, MA Jan 2026 - Present

VR Design Co-Op at Amazon Robotics in North Reading, MA Jan 2025 - Dec 2025

- × Collaborated on the development of the conceptual framework for a new product, synthesizing cross-disciplinary perspectives into a future-facing vision through idea generation and visual storytelling.
- × Led industrial design of a key robotic component, translating complex cross-functional requirements into concept directions and a unified design proposal.
- × Spearheaded the concept development and prototyping of an AI-enabled AR experience that reimaged existing packing workflows to improve associate speed and accuracy.
- × Designed gamification concepts that transformed workflows into engaging associate experiences.
- × Created wireframe mock-ups using Figma and functional prototypes for Magic Leap in Unity.
- × Developed VR testbed with documentation for team adoption, **reducing robotics testing time by 33%**.
- × Conducted user research through site visits, virtual interviews, and data analysis to align designs with stakeholder needs.

Skills: Figma, Unity3D, Magic Leap 2, Apple Vision Pro, Rhino3D, Solidworks, Meta Quest 3, Adobe Creative Suite, Unreal Engine.

Design Intern at Tesla in San Francisco, CA May 2022 - Aug 2022

- × Led spatial and environmental design concepts, translating brand intent into iterative visualizations, physical environments, and presentations that built alignment with department leadership.
- × Developed a spatial branding concepts, **which were selected by company leadership** from four competing design directions.

Skills: Branding Design, Photoshop, Revit, AutoCAD, Spatial Design, Presentation Assembly

Designer at Partisans in Toronto, ON Sep 2019 - Aug 2020

- × Developed computational design and fabrication strategies for a complex architectural ceiling, preserving design intent while **reducing fabrication costs by \$200K**.
- × Contributed to the design and delivery of Michelin Star-winning restaurant Vela across visualization, fabrication rationalization, construction documentation, client presentations, consultant coordination, and on-site execution.

Skills: Concept Design, Environmental Design, 3D Modeling, C# Scripting, Visualization (VRay, Photoshop, Illustrator), Grasshopper, Rhino3D, Construction Drawing Coordination, HoloLens

Research Assistant at TMU with Vincent Hui in Toronto, ON Sep 2018 - Aug 2021

- × Led implementation of VR, AR, MR, and videogames in architectural education and pioneered frameworks for incorporating technologies into studio courses.
- × Conceptualized and developed an experimental 4D architectural videogame exploring multidimensional space through interactive world building, using Unity and custom GLSL shaders.
- × Designed an enclosure for viewing VR experiences of indigenous architecture in museums, which **won the Ontario Museum Award**.
- × Published and presented 20 conference papers (1st author on 4 papers, rest of papers 2nd author), 1 journal article, 1 book chapter, and wrote 3 grants.
- × Awarded USRA grant for Natural Sciences and Engineering Research Council of Canada (NSERC).

Skills: Unity3D, VR/AR/MR, HoloLens, Meta Quest, 3D Modeling, Fabrication, Exhibition Curation, GLSL, Product Design, TouchDesigner, Game Design

Education.

Master of Architecture & Master of Science in Electrical Engineering and Computer Science

at Massachusetts Institute of Technology in Cambridge, MA Sep 2021 – Jan 2025

- × Certificate in Teaching from Teaching and Learning Lab.
- × Thesis "Architecture as Prosthesis" with advisor Skylar Tibbits and reader Stefanie Mueller, explored how environments might shape the evolution of the human body through AI, neural networks, videogame simulation, world building, and speculative design.

Bachelor of Architectural Science

at Toronto Metropolitan University in Toronto, ON Sep 2016 – Jun 2021
